RAGE BEAR code Deep-Dive!

```
38  int buttonState = digitalRead(buttonPin);
39
40  // Check if button was pressed (if button state transitioned from HIGH to LOW)
41  if (lastButtonState == HIGH && buttonState == LOW) {
42    analogWrite(ledPinG, 255);
43    analogWrite(led2PinG, 255);
44    delay(500);
45    analogWrite(ledPinG, 0);
46    analogWrite(led2PinG, 0);
47    systemActive = !systemActive; // Toggle system state (from ON <-> OFF)
48    delay(200);
49
50  }
51
52  lastButtonState = buttonState;
```

Green light that signals when RAGEBEAR is turned on or off

RAGE BEAR code Deep-Dive!

```
54  // BEAR FUNCTIONALITY
55  if (systemActive) {
56    // Check if the vibration sensor is triggered
57    if (digitalRead(sensorPin) == HIGH) {
58      analogWrite(ledPin, 0); // Turn bear eyes off when impact/vibration occurs
59      analogWrite(led2Pin, 0);
60      tone(piezoPin, 1000);
61      delay(50);
62      tone(piezoPin, 0);
63      delay(50);
64      tone(piezoPin, 350);
65      delay(200);
66    } else {
67      analogWrite(ledPin, 255);  // Keep LEDs on when no vibration
68      analogWrite(led2Pin, 255);
69      noTone(piezoPin);
70    }
71  } else {
72    // If system is OFF: keep LEDs OFF regardless of sensor input
73    analogWrite(ledPin, 0);
74    analogWrite(led2Pin, 0);
75    noTone(piezoPin);
76  }
```

Combo of buzzer tones that creates RAGEBEAR's signature scream

“It’s AGGRESSIVELY CUTE”

“WOULD BUY JUST TO DISPLAY”

“I WOULD USE THIS PRODUCT”

“GREAT AESTHETIC BUT NOT TOO CUTE TO PUNCH”

“HOW WILL IT STAY ON DURING RAGE”
